Investment Philosophy and Objective

The Incrementum Crypto Gold Fund invests in securities with a focus on precious metals and cryptocurrencies. The strategy offers a liquid, alternative investment and combines the oldest asset classes gold and silver with the most promising, innovative cryptocurrencies. The fund is broadly positioned in precious metals and cryptocurrencies. Precious metal accounts, ETCs, gold and silver mining stocks and options are used to implement the allocation. The strategic asset allocation is one-third gold, one-third silver and one-third cryptocurrencies and is actively managed within target ranges. This UCITS fund (UCITS V) offers daily liquidity and is denominated in euro. The recommended minimum investment horizon is 5 years.

Geschäftsführer **Herr. Ronald Peter Stöferle** MBA B.Fin B.Econ MFTA CFTe r.stoferle@incrementum.li

Mr. Ronald Peter Stöferle is partner of Incrementum AG and responsible for Research and Portfolio Management. At the age of 14 he bought his first share, and his fascination with the financial markets was further fuelled during the dotcom boom. He has felt this passion ever since, which is why he is happy to have found his vocation at a young age. He studied Business Administration and Finance in the USA and at the Vienna University of Economics and Business Administration, and also gained work experience at the trading desk of a bank during his studies. Upon graduation he joined the Research department of Erste Group, where he published his first “In Gold We Trust” report in 2007. Over the years, the Gold Report has proceeded to become one of the benchmark publications on gold, money, and inflation.
