Investment Philosophy and Objective

The Fund invests primarily in companies engaged in exploration, mining, processing, or dealing in gold, or, to a lesser degree, in silver, platinum, diamonds, or other precious metals and minerals. The fund normally invests at least 80% of its assets in securities of companies principally engaged in gold-related activities, and in gold bullion or coins.

Gold-related activities may include exploration, mining, processing, or dealing in gold, or the manufacture or distribution of gold products such as jewelry, watches, and gold foil and leaf. Companies principally engaged in gold-related activities may also include companies that invest in other companies engaged in gold-related activities. The Adviser treats investments in instruments whose value is linked to the price of gold as investments in gold bullion or coins.
