## Investment Philosophy and Objective

AIPM JUNIOR MINING & EXPLORATION UCITS FUND is an absolute return fund that invests in small to medium sized mining companies. Indirect investments in precious metals shall be permitted to a limited extent to allow the Fund to participate in price movements in the aforementioned asset classes.

The assets of the Fund shall be invested in accordance with the principle of risk diversification primarily in equity securities of very small to medium-sized companies listed on a stock exchange (micro, small & mid caps). These companies are located mainly in Canada, Australia and the USA but also in other promising countries. The selection of investments shall be based principally on the fundamental outlook, with particular attention being paid to the potential for prospecting success. As promising small companies are often taken over by larger enterprises, there is potential for attractive capital gains.
